

Aaron Wen

(+1) 571-413-7511 | linmengfdm@gmail.com | Website: astro-wen.github.io/Astro

EDUCATION

University of California, Los Angeles (GPA: 3.8/4.0)

Sep 2024 - Present

B.S. Statistics and Data Science & B.A. Business Economics; Minor in Data Science Engineering

Flexible graduation: Jun 2027–Jun 2028 | Available for 2027 internships or full-time roles.

Coursework: Introduction to Databases, Statistical Modeling, Probability Theory, Machine Learning

PROFESSIONAL EXPERIENCE

TikTok (ByteDance) Performance Evaluation: E+ (Significantly Exceeds Expectations)

San Jose, CA

AI Product Manager Intern, Product Infrastructure - Customer Service Platform

Jun 2026 - Sep 2026

- Independently owned and launched **ByteHi's manual annotation platform** for customer-service AI; **designed and built the frontend**, partnering with one full-stack engineer on APIs and rollout. Unified intake, annotation, and quality review for global teams, raising throughput from **under 70 to 250–300 cases/hour**.
- Led the launch of a **privacy filtering service** for customer-service AI; translated regulatory requirements into **11 sensitive-data categories, 4 languages**, and real-time, batch, and conversation APIs. Helped define rule- and model-based detection, fallback behavior, and quality monitoring for auditable redaction in global production.
- Owned the **diagnosis and evaluation module** of an AI self-improvement platform; partnered with ML and backend engineers on evidence collection, root-cause analysis, proposed fixes, and independent validation. Internal MVP testing cut CSAT investigations from **2 days–2 weeks to under 30 minutes**.
- Interviewed support operators and independently launched **natural-language search**, replacing **21+ manual filters** for conversation investigations; defined hybrid retrieval, relevance metrics, saved results, and latency safeguards. Used **SQL, Apache Hive, and dashboards** to guide analysis and product decisions.
- Contributed to the architecture of a **customer-service AI agent**, replacing rigid scripts with natural-language skills; helped define **LangGraph and ReAct** reasoning and tool use for flexible support conversations.

Notique AI (Startup)

Los Angeles, CA

Co-Founder & Head of Product

May 2026 - Present

- Co-founded an **AI recording pen and companion SaaS** for U.S. real estate professionals, addressing missed client details and repetitive CRM entry. Launched the pen on Amazon; used **20+ user interviews**, feedback, and **MySQL / Tableau** analysis to prioritize onboarding, adoption, and retention.
- Built the SaaS **project-memory experience with an AI workflow**, using **React, TypeScript, server APIs, and Cloudflare D1/R2**; turned recordings, transcripts, and photos into reviewable AI briefs with citations and timestamps. Added review and change timelines; automated development enabled multiple iterations per day.
- Defined **two-stage extraction and verification** with user approval before saving facts; added resumable AI jobs and offline evaluation for missed facts, unsupported citations, and consistency across conversations.

Tencent

Shenzhen, China / Los Angeles, CA

AI Product Manager Intern, Interactive Entertainment, R&D Systems Management

Jun 2025 - Jun 2026

- Owned developer-platform engagement: **skill competitions**, virtual-currency economy design, reward loops, and progression milestones; lifted homepage **DAU by 35%** and **two-month retention by 73%**.
- Pitched and launched a **player-personality quiz**; defined requirements, built the frontend, and tracked the sharing funnel. **A/B tested** covers, questions, and character sets, reaching **20,000+ participants in 20 days**.
- Owned **AI "Skillhub"**, a skill-sharing community, end to end, from product planning to frontend development with one backend engineer; made **33,000+ AI capabilities** searchable by game-developer role, adding human review, deduplication, validity checks, and usage feedback to help teams discover and reuse reliable AI tools.
- Independently identified fragmented AI knowledge and owned **"Aico"**, an AI knowledge platform, from strategy to frontend development with one backend engineer; unified industry insights, internal practices, tools, courses, and experts for **27,000 stable daily active users**, roughly one-third of Tencent employees.
- Owned the **Tencent Academy** homepage redesign for employee learning and content discovery; defined automated tagging, relevance ranking, and a **creator analytics dashboard**, using SQL for product analysis.

SKILLS

Product Methods: User Research, Experiments, Product Strategy, Roadmapping, Requirements, KPI Design

Analytics & Data: A/B Testing, Funnel & Cohort Analysis, Statistical Modeling, SQL, Python, R

Engineering & AI: React, TypeScript, REST APIs, AI-assisted Prototyping, LLM Evaluation, Semantic Search, RAG

Tools: Figma, Jira, Tableau, Power BI, Excel, Git, Claude Code, Cursor

Languages: Mandarin (Native), English (Fluent)
